
Referral Link Problem

Posted by elzbieta - 2008/01/24 10:13

Hi,

Are there on going problems with the referral link?
When I click my link:

http://www.opportunity-dock.com/ref.php?user_id=111

the page comes up:

Access denied for user 'sydney'@'localhost' (using password: YES).

Also are the banners functioning or it may be my browser settings.

A new traffic exchange has launched this week and I want to advertise on it. Each day a new phase is unveiled and it will be fully functional on 01/29. Looks promising but I need my link to work. Please let me know.

Thanks,
Elzbieta
